Course and Teacher Evaluations - Comments

Please summarize your reaction to this course focusing on the aspects that were most important to you.

an utter waste of time and energy! The idea of introducing the business aspect was really interesting and feel that should not be changed but more time should be spent on novel and cutting edge technology/Terrible class. Instructor doesn't care about teaching at all. Instructor was late to around 80% of the lectures, even after sending out e-mails asking students to "please be on time for class, to show respect for fellow classmates." Spends more time talking about the syllabus than teaching. Doesn't have a good understanding of the material being taught. Had an April Fools Day joke as a class handout without realizing it.
