

# VLSI and Nanotechnology in Energy, Environment, and Neuromorphic Computation

Organized by

**Centre for Advanced Electronics (CAE)**  
**Indian Institute of Technology Indore**

December 21-23, 2020

## Course Overview

This short term course (STC) will cover topics in nanotechnology for next-generation applications in electronics, photonics, memory technologies, biochemical sensors, solar cells, energy storage and converters for the advancement of knowledge. This brings together expertise from engineers/scientists in different premier institutes in the country and abroad. This STC is designed to give an exposure to design of experiments, material growth, characterizations and device/system fabrication and system packaging and integration. This course is aimed to bring together engineers, technologists, scientists and researchers through academic training and learning activities to augment and expand on acquired knowledge and encourage in-depth discussions through tutorials to prepare for research-led activities. This STC is in line with various GoI initiatives such as Make in India, NITI Aayog, Aatmanirbhar Bharat, Digital India so on and so forth.
